

JOB DESCRIPTION

SCALA ENGINEER

We are looking for a talented Scala Engineer to join our team in Lausanne, Switzerland. As a member of our team, you would be contributing to our core product SILO, a digital asset management solution designed for financial institutions. You would be working closely with blockchain experts, security engineers and hardware manufacturers. Your contribution would have a direct impact on the evolution of the cryptocurrency/fintech industry as we know it today.

Responsibilities

- Experience building scalable and/or distributed applications in Scala and/or an OO language and basic functional exposure (e.g. Clojure, Haskell, Elm, Erlang, Lisp, ML, Scheme, or Boost.Lambda etc.)
- Experience with (or a willingness to learn and regularly use) Idiomatic Scala
- Experience with Kanban or SCRUM, and a willingness to actively participate in ceremonies
- Test driven development, code reviews, and pairing from time to time

Requirements

- +3y hands-on experience in software development
- Willingness to program in a functional style

Desirable

- Experience with Scala frameworks and libraries such as Cats, Zio, Akka, etc.
- Experience with distributed systems
- Experience with Redis or PostgreSQL
- Experience with Blockchain technology
- Docker / Kubernetes / AWS / Google Cloud

Applications

Get in touch by sending your CV to jobs@metaco.com.

If your skill set doesn't fit perfectly within our requirements, please do not hesitate to apply.
