

JOB DESCRIPTION

SDET / QA AUTOMATION ENGINEER

We are looking for a talented SDET / QA Automation Engineer to join our team in Lausanne, Switzerland. As a member of our team, you would be contributing to our core product SILO, a digital asset management solution designed for financial institutions. You would be working closely with blockchain experts, security engineers and hardware manufacturers. Your contribution would have a direct impact on the evolution of the cryptocurrency/fintech industry as we know it today.

Responsibilities

- Maintain integration and end to end tests written in either Java, Scala, Python, or Go
- Design and implement test cases for integration and system tests for SILO, our custody platform.
- Automation of tasks and test cases
- Discussion and alignment with the Engineering Team
- Operation and support of the application in production
- Enthusiasm to extend the field of activity and having the will to deal with new technologies

Desirable

- Proven experience as an SDET or Quality Assurance Engineer or similar
- Experience in QA methodology
- Familiarity with Agile frameworks and regression testing is a plus

Applications

Get in touch by sending your CV to jobs@metaco.com.

If your skill set doesn't fit perfectly within our requirements, please do not hesitate to apply.
